BRUK AV UTM RUTENETT FOR REFERANSEPUNKTER

Instruction in using UTM grid for reference points

| SOMBELTET GRID ZONE DESIGNATION | KARTREFERANSE GRID NOTE | EGENPUNKT SAMPLE POINT | VÅLSTAD GRID | TO GIVE A STANDARD REFERENCE ON THIS GRID TO NEAREST 10 METERS |
|------------------------------------|--|---------------------------|-----------------|---|
| 32V | 100 km scale (cf. Fig. 10-10) | NN | 64 | Read meters indicating 100,000 meter square in which the point lies |
| NN | Første radering til venstre for punktet. Avoided double 0 before 00 scale | 64 | 4 | Locate first VERTICAL grid line to LEFT of point and read LARGE figure showing the size meter on the top or bottom margin, or on the line itself. Estimate tenths from grid line to point |
| | Første radering under punktet. Avoided double 0 before 00 scale | NN64463 | 46 | Locate first HORIZONTAL grid line BELOW point and read LARGE figure showing the line meter on the left or right margin, or on the line itself. Estimate tenths from grid line to point |
| | Dot or 10 10 scale point used in following Reference to GRIDBELTTE og 1000 meter kvadrater | NN64463 | 46 | Locate first VERTICAL grid line BELOW point and read LARGE figure showing the line meter on the left or right margin, or on the line itself. Estimate tenths from grid line to point |
| | SMA radering og full kvadrant. | 32VNN64463 | 46 | Locate the SMALLER figure of any grid number. There are four lines the full coordinate, the ONLY the LARGE figure of the grid number. |
| | Skilletegning | NN64463 | 46 | |
| | Dot or 10 10 scale point used in following Reference to GRIDBELTTE og 1000 meter kvadrater | 32VNN64463 | 46 | Locate the SMALLER figure of any grid number. There are four lines the full coordinate, the ONLY the LARGE figure of the grid number. |
